

# Quiet, Compact, Efficient

The new intelligent **HRX-aQ** takes domestic heat recovery to a new level, incorporating features such as; wireless controls, delay on timer, auto frost protection, intelligent summer bypass and much more.

This all comes packaged at a cost that suits the demands of today's Design and Build market.

## The **HRX-aQ**

Intelligent Ventilation Coming Soon

### Quiet

Background (normal) ventilation 24dB(A).

Break out and induct noise eliminated by reduced internal resistance and high density materials to give optimum sound reduction.

### Compact

The smallest void mounted unit of its type.  
199mm deep x 520mm wide x 820mm long.  
Only 7.9kg in weight for simple 'one man' installation.

Connects directly to Domus 204x60mm flat duct.

Simple to 'design in'. Easy and cost effective to install. Efficiency by design.

### Efficient

Kitchen +1 wet room 0.66 W/(l/s), 88% heat exchange performance.

Offers optimum efficiency wrapped up in the smallest void mounted MVHR unit available - giving peace of mind for the quietest commissioned systems.

Manufactured from high density materials to give optimal noise reduction.

Perfect for residential apartment solutions, whilst offering the lowest installed cost.

#### Typical Installed Performance:

Kitchen +1: SFP - 0.58, 88% heat exchange efficiency  
Kitchen +2: SFP - 0.69, 85% heat exchange efficiency

#### Sound:

24dB(A) low (normal)

#### Dimensions:

(WxLxDmm): 520x820x199\*  
\*Length is 850mm with sockets  
Other sized units also available

#### Weight:

7.9kg

#### Socket size:

204x60mm with integral flow straighteners
