## Soil Systems

Developed and manufactured with quality, innovation and longevity in mind, Polypipe Building Products' soil range is the most comprehensive and technologically advanced in the UK residential market.

Take, for example, our PolySoil® systems. Manufactured using single-piece moulding technology, they offer improved performance and system durability. This, in conjunction with our Ring Lock Seal technology, removes the risk of seal distortion and dislodging during fitting, for straightforward, secure installation.

Our PolySoil® and Solvent Weld soil systems are available in an extensive range of colours and sizes, making them suitable for most projects. When it comes to heritage projects where both product and installation costs are a consideration, our Cast Iron Effect ring seal system combines traditional aesthetics with modern performance. In instances where cast iron might be specified for its sound-deadening qualities, we also offer our Acoustic Soil system, maximising resident comfort while remaining cost-effective.

## Waste Systems

Polypipe Building Products' comprehensive waste range includes three solvent weld waste systems, ABS, MuPVC & Overflow, accompanied by Push-fit, compression and Push-fit overflow products.

Our updated waste range now features two new unique technologies, both of which are offered by Polypipe for the first time in drainage and waste products in the UK. Present in our ABS, Push-fit & compression waste fittings and our ABS & Push-fit Multi-layer waste pipe, BioCote® Antimicrobial technology kills 99.99% of all bacteria that comes into contact with either the outer or inner surface of pipes and fittings.

The bacteria-killing technology also reduces unpleasant odours and blockages in waste systems, ordinarily caused by the build-up of biofilm. With our second unique feature, you can help to minimise your project's carbon footprint, through the specification of our sustainable new Multi-layer waste pipe construction, which uses recycled material in its core.

## Rainwater Systems

**Polypipe has the most comprehensive rainwater offer in the UK, in both profiles and colours.**

Our ranges are also supported by our vast range of adaptors which allow our systems to be connected to nearly all types of existing installations, including cast iron. Polypipe Building Products in recent years has also innovated with its unique Notched Ogee gutter system, which stops gutter becoming dislodged through heat expansion and contraction. Our Elegance Cast Iron Effect range is a perfect cost effective solution to traditional cast iron systems where local planning requires this type of system to be installed.

## Plumbing & Heating Pipe

**At the heart** of the Polypipe Plumbing and Heating Systems product offer is our commitment to polybutylene pipe.

We choose polybutylene to create the most flexible and efficient pipes and jointing systems available. Polybutylene pipe is ideal for both domestic hot and cold water plumbing and heating systems, offering exceptional durability and long-term performance, which has seen it become the preferred material choice for today's building projects.

The most important characteristic of polybutylene is its natural flexibility, allowing you to bend the pipe into even the tightest of spaces. Polybutylene is the most malleable plastic used in the manufacture of piping systems.

Another key advantage of polybutylene pipe is that it is extremely lightweight, particularly when compared with copper piping systems. For example, 15mm copper tube will weigh approximately 0.28kg/m, compared to just 0.074kg/m for polybutylene. This significant weight reduction is invaluable when transporting materials to site.

Polybutylene pipe has good resistance to freezing temperatures, maintaining long-term durability in heating and water applications. This, combined with the pipe's elasticity, means that if water is subjected to freezing temperatures, a burst pipe is less likely.

Our plumbing systems also give improved performance over rigid pipe systems in terms of low noise transmission and low water hammer effect.

## Water Supply Regulations

**REG4** The Water Supply (Water Fitting) Regulations 1999 play an important role in protecting public health, safeguarding water supplies and promoting the efficient use of water within premises across the UK. All products connected to the UK water supply must comply with Regulation 4 of Water Supply (Water Fittings) Regulations 1999, Water Supply (Water Fittings) (Scotland) Byelaws 2014 and Water Supply (Water Fittings) Regulations (Northern Ireland) 2009.

Their purpose is to prevent the contamination and waste of water supplied by a water undertaker once it has entered a customer's plumbing system. Ensuring that water fittings are of an appropriate quality and standard for installation is an integral aspect of the regulations.

'Reg 4' approval can be obtained from a number of certification providers such as WRAS, NSF and KIWA. Certificates can be obtained on request.

## Polyplumb

### Traditional push-fit plumbing

**PolyPlumb** is our original, tried and tested, grey plumbing system. Robust and reliable, PolyPlumb has stood the test of time.

PolyPlumb fittings feature a one step jointing process and a high performance stainless steel grab ring within the fitting, ensuring superb joint integrity. Use PolyPlumb with Polypipe grey polybutylene flexible pipe, or you can combine PolyPlumb fittings and copper pipe.

We recommend the use of a Polypipe metal or plastic pipe stiffener when used with plastic pipe.

PolyPlumb is suitable for use in most plumbing and heating installations including hot and cold water and underfloor heating applications.

## PolySure

### Permanent press-fit plumbing

**PolySure** is our radial press-fit system, available in UK sizes, in both metal and plastic bodied solutions, and installed using specialist crimping tools.

PolySure features secure, tamperproof jointing technology for a permanent fit. The slim profile fittings are ideal for use in visible installations. An inbuilt location washer ensures the crimping tool jaws are correctly positioned for accurate fitting and a visual socket depth indicator and double 'O'-ring seal provides enhanced jointing.

Use PolySure with Polypipe white or grey polybutylene flexible pipe.

PolySure can be used in most hot and cold water installations but is particularly suited to buildings with high levels of public access traffic, where security and joint integrity are paramount.

## To help us improve our service level please ensure your orders:

- State clearly any Special Delivery Instructions, times, access, vehicle types.
- Product codes should be used when placing your order.
- Product codes always override product descriptions.
- Product pack & bag quantities should be observed and clearly stated as identified in this publication.
- When ordering products with colour options please use suffix detailed at top of page e.g. Grey (G).
- Carriage paid values detailed adjacent should be considered.

## Pack Quantities

In order to provide our customers with shorter lead times we are looking for your support when placing orders.

Therefore to enable us to fulfil this, please place your orders in pack multiple quantities only.

Products not ordered in pack multiples will be rounded up to the next saleable pack multiple.

## Stillage Deliveries

Extrusions are available in wooden frames for mechanical offload. Please refer to pack quantity list for detail.

Mixed product frames are not available.

BAGS are only available in stillages by prior arrangement in pre-determined product/pack configuration. A charge will be levied on all metal stillages and refundable on return. A contract would be established to control and monitor stillage movements.

## Carriage Paid Order Values

- Merchant Stock – £1000.00 net
