

Job Vacancy

Process Technician – Production, Polypipe Civils & Green Urbanisation

An exciting opportunity has arisen to appoint 2 x Process Technician's at the Horncastle Site.

This is a full-time position with hours averaging 42 hours per week.

The working pattern will be 4 days, 7am – 7pm followed by 4 days off.

Role Outline

Reporting directly to the Process Development Leader, the Process Technician will provide support to the production and engineering teams ensuring all maintenance, training & development activities are carried out and contribute to continuous improvement.

Core Responsibilities

- 'hands on' following the planned maintenance schedule for each machine
- Responsible for leading product changeovers, TPM's, shutting down and starting production equipment, ensuring targets are met with minimal disruption to production
- Has a 'Safety First' attitude towards themselves and others on site
- Can competently risk assess new tasks and support in producing SSoW's
- Develop robust training plans for teams ensuring full flexibility across departments
- Develop high performance focussed work teams
- Understand and identify the varied materials and machine issues when a problem occurs
- Constantly seek new ways of working to improve efficiencies within the department
- Daily monitoring of equipment using the Mattec system and have an ability to use root cause analysis and problem solve
- Operator Maintenance Tasks are completed in a timely manner
- Accurately measure key input and output parameters
- Use lean tools and techniques to drive sustainable solutions – 5s/Kanban/TPM/SMED

Key knowledge, skills and abilities

- Minimum of 5 years' experience within a manufacturing department
- Experience of Health and Safety Audits including risk assessments
- Lean Manufacturing experience including Root Cause Analysis desirable
- Experience in the waste industry desirable
- Leads by example and communicates between all departments
- Highly motivated, reliable with a strong work ethic
- Self-motivated, able to resolve problems safely through their own forward thinking

To apply for this position, please submit an up-to-date CV along with a covering letter addressed to the HR Department at cguhr@polypipe.com

Closing date for applications is Friday 16th June 2023
