This is a full-time position with hours averaging 42 hours per week.

The working pattern will be 7 – 7 2 days & 2 nights followed by 4 days off.

Role Outline

Reporting to the Production Manager, the Specialist Products Operator will be responsible for the running of plastic extrusion lines and the fabrication of plastic drainage products.

Core Responsibilities

- To maintain high quality standards, whilst meeting agreed targets safely and efficiently.
- Actively promote ideas to improve the quality level to meet and exceed company quality standards whilst always ensuring that the customer (internal and external) is protected.
- Control all waste and create ideas which reduce scrap levels to agreed targets.
- Assist the team with writing Risk assessments, SSoWs, ensuring process documentation is maintained at all times.
- Facilitate the removal of non-value added work within the production unit.
- Maintain an effective level of communication at all times across all shifts and with support functions.
- Adhere to all requirements laid out within the company hand book.
- To ensure that through your actions you do not place either yourself or colleagues in any form of danger through bad practice/ horse play / or use of damaged equipment.
- Any additional activities as directed by any Polypipe supervision or managerial staff.

Key knowledge, skills and abilities

- Ability to read and understand technical drawings.
- Preferably previous experience of undertaking fabrication tasks.
- Previous experience within continuous manufacturing industry.
- Good attention to detail and an organised approach to work.
- Proven ability to achieve against performance measures or KPIs.
- Preferably previous involvement in continuous improvement initiatives.
- Valid FLT Licence would be advantageous.

To apply for this position, please submit an up-to-date CV along with a covering letter to the HR Department at cguhr@polypipe.com.

Closing date for applications is Friday 2nd June 2023
