Soil Systems

Developed and manufactured with quality, innovation and longevity in mind, Polypipe Building Products' soil range is the most comprehensive and technologically advanced in the UK residential market.

Take, for example, our PolySoil® systems. Manufactured using single-piece moulding technology, they offer improved performance and system durability. This, in conjunction with our Ring Lock Seal technology, removes the risk of seal distortion and dislodging during fitting, for straightforward, secure installation.

Our PolySoil® and Solvent Weld soil systems are available in an extensive range of colours and sizes, making them suitable for most projects. When it comes to heritage projects where both product and installation costs are a consideration, our Cast Iron Effect ring seal system combines traditional aesthetics with modern performance. In instances where cast iron might be specified for its sound-deadening qualities, we also offer our Acoustic Soil system, maximising resident comfort while remaining cost-effective.

Waste Systems

Polypipe Building Products' comprehensive waste range includes three solvent weld waste systems, ABS, MuPVC & Overflow, accompanied by Push-fit, compression and Push-fit overflow products.

Our updated waste range now features two new unique technologies, both of which are offered by Polypipe for the first time in drainage and waste products in the UK. Present in our ABS, Push-fit & compression waste fittings and our ABS & Push-fit Multi-layer waste pipe, BioCote® Antimicrobial technology kills 99.99% of all bacteria that comes into contact with either the outer or inner surface of pipes and fittings.

The bacteria-killing technology also reduces unpleasant odours and blockages in waste systems, ordinarily caused by the build-up of biofilm. With our second unique feature, you can help to minimise your project's carbon footprint, through the specification of our sustainable new Multi-layer waste pipe construction, which uses recycled material in its core.

Rainwater Systems

Polypipe has the most comprehensive rainwater offer in the UK, in both profiles and colours.

Our ranges are also supported by our vast range of adaptors which allow our systems to be connected to nearly all types of existing installations, including cast iron. Polypipe Building Products in recent years has also innovated with its unique Notched Ogee gutter system, which stops gutter becoming dislodged through heat expansion and contraction. Our Elegance Cast Iron Effect range is a perfect cost effective solution to traditional cast iron systems where local planning requires this type of system to be installed.

Plumbing & Heating Pipe

At the heart of the Polypipe Plumbing and Heating Systems product offer is our commitment to polybutylene pipe.

We choose polybutylene to create the most flexible and efficient pipes and jointing systems available. Polybutylene pipe is ideal for both domestic hot and cold water plumbing and heating systems, offering exceptional durability and long-term performance, which has seen it become the preferred material choice for today's building projects.

The most important characteristic of polybutylene is its natural flexibility, allowing you to bend the pipe into even the tightest of spaces. Polybutylene is the most malleable plastic used in the manufacture of piping systems.

Another key advantage of polybutylene pipe is that it is extremely lightweight, particularly when compared with copper piping systems. For example, 15mm copper tube will weigh approximately 0.28kg/m, compared to just 0.074kg/m for polybutylene. This significant weight reduction is invaluable when transporting materials to site.

Polybutylene pipe has good resistance to freezing temperatures, maintaining long-term durability in heating and water applications. This, combined with the pipe's elasticity, means that if water is subjected to freezing temperatures, a burst pipe is less likely.

Our plumbing systems also give improved performance over rigid pipe systems in terms of low noise transmission and low water hammer effect.

Water Supply Regulations

REG4 The Water Supply (Water Fitting) Regulations 1999 play an important role in protecting public health, safeguarding water supplies and promoting the efficient use of water within premises across the UK. All products connected to the UK water supply must comply with Regulation 4 of Water Supply (Water Fittings) Regulations 1999, Water Supply (Water Fittings) (Scotland) Byelaws 2014 and Water Supply (Water Fittings) Regulations (Northern Ireland) 2009.

Their purpose is to prevent the contamination and waste of water supplied by a water undertaker once it has entered a customer's plumbing system. Ensuring that water fittings are of an appropriate quality and standard for installation is an integral aspect of the regulations.

'Reg 4' approval can be obtained from a number of certification providers such as WRAS, NSF and KIWA. Certificates can be obtained on request.

Improved jointing confidence with In-Cert®

The PolyPlumb® Enhanced fitting features our patented In-Cert® providing the installer with improved jointing confidence and peace of mind through haptic feedback. The In-Cert® is manufactured from a high specification engineering polymer used in demanding automotive, aerospace and medical applications.

The In-Cert® incorporates a 360° wave feature in its head which engages with projections within the socket. The haptic click of the In-Cert® technology gives real confidence; just push the pipe home, twist and you know the jobs done; push, twist, know.

Both the original metal and plastic pipe stiffeners can be used with the new PolyPlumb® Enhanced fittings, however, whilst these are compatible with PolyPlumb® Enhanced they do not feature the In-Cert® Feedback Technology.

The new In-Cert® pipe stiffener can also be used with the original PolyPlumb® and other Polypipe Push-Fit systems however positive feedback will not be gained.

PolySure

Permanent press-fit plumbing

PolySure is our radial press-fit system, available in UK sizes, in both metal and plastic bodied solutions, and installed using specialist crimping tools.

PolySure features secure, tamperproof jointing technology for a permanent fit. The slim profile fittings are ideal for use in visible installations. An inbuilt location washer ensures the crimping tool jaws are correctly positioned for accurate fitting and a visual socket depth indicator and double 'O'-ring seal provides enhanced jointing.

Use PolySure with Polypipe white or grey polybutylene flexible pipe.

PolySure can be used in most hot and cold water installations but is particularly suited to buildings with high levels of public access traffic, where security and joint integrity are paramount.

Underfloor Heating Products

IN THE FLOOR SYSTEMS

Underfloor heating for solid or screeded floors.

Predominately installed in new build or renovation where a floor requires excavation.

- Polypipe Underfloor Heating offers four systems for solid or screeded floors: the unique Polypipe Red Floor Panel system which ensures accurate installation and positioning, and the more traditional rail and staple systems.

BETWEEN THE JOISTS SYSTEMS

Underfloor heating for suspended floors.

For suspended timber and composite joists, typically found in new build and renovation projects, Polypipe offers a range of unique pre-insulated and pre-configured systems, as well as more traditional suspended floor underfloor heating options; giving you a solution for every type of suspended floor installation.

OVER THE FLOOR SYSTEMS

Underfloor heating that goes over the floor.

For existing solid or timber deck floors - Polypipe's unique Overlay® underfloor heating range of low-profile systems are installed over the existing floor. This makes them ideal for renovation and new build, whole house, and single room projects.

To help us improve our service level please ensure your orders:

- State clearly any Special Delivery Instructions, times, access, vehicle types.
- Product codes should be used when placing your order.
- Product codes always override product descriptions.
- Product pack & bag quantities should be observed and clearly stated as identified in this publication.
- When ordering products with colour options please use suffix detailed at top of page e.g. Grey (G).
- Carriage paid values detailed adjacent should be considered.
- Complete promptly and return our logistics sheet (this is automatically sent to you when we create any new delivery points on your behalf).
- Any order alterations/cancellations will only be accepted up to the point when the load is compiled. It is not possible to effect changes after this.
- We will advise when orders fall short of the carriage paid terms and we have no other orders outstanding to which we can add to. We do not have facility on our system to process and hold low value orders.

Pack Quantities

In order to provide our customers with shorter lead times we are looking for your support when placing orders.

Therefore to enable us to fulfil this, please place your orders in pack multiple quantities only.

We have carried out extensive research and reduced many of our pack quantities to satisfy the needs of today's market.

Products not ordered in pack multiples will be rounded up to the next saleable pack multiple.

Stillage Deliveries

Extrusions are available in wooden frames for mechanical offload. Please refer to pack quantity list for detail.

Mixed product frames are not available.

BAGS are only available in stillages by prior arrangement in pre-determined product/pack configuration. A charge will be levied on all metal stillages and refundable on return. A contract would be established to control and monitor stillage movements.

Delivery Targets

- Merchants stock within a 7 working day period - not including day order was received.
- Building sites within a 5 working day period - not including day order was received.
- Other delivery requirements and emergency requests by prior arrangement.

Site Deliveries

We will require logistical information before attempting to deliver to any new sites. Your prompt attention to these requests is important due to the short lead-time expectancy of end users.

Emergency Collections Facility

We do have a pre-booked collection facility for emergency orders. A 48-hour notice period is required to comply with our health and safety policies.

Carriage Paid Order Values

- Merchant Stock – £1000.00 net
- Site Deliveries – £2500.00 net

Minimum Order Values

Minimum order values will be agreed and displayed in each customer's Commercial Trading Agreement which may supercede the above.

Carrier

We can offer a 48-hour carrier facility to cater for your urgent requests. A scale charge will apply for this facility. Details are available on request. We do not offer an overnight service.

Claims for Shortages & Damaged Extrusions (Pipes, Gutters and Large Mouldings)

Our drivers will countersign the delivery note as each of these products are offloaded.

Bags

Each bag delivered will be identified with Customer name, load number, individual bag number and total bag count of your consignment.

The driver will offload and bag count. He will obtain your signature as confirmation that you have received the correct number of bags.

Discrepancy Notification

All extrusions - i.e. pipes gutters and large mouldings are listed at the start of the advice note inventory. Any discrepancies in relation to Pipes, Gutters and Large Mouldings must be noted on the advice note at the time of delivery.

Bags - Any discrepancy relating to the number of bags delivered must be noted on the advice note at the time of delivery. Any discrepancies on bag contents must be advised within 7 days of delivery.

Proof of Deliveries

Return of Products

We do not accept return of any product surplus to requirement unless previously agreed in writing. Last minute customer cancellations may also be subject to a cancellation charge. Any agreed product returns would be subject to 25% re-stocking charge (£60 minimum).

However, should a Customer place an Order using an incorrect price then the Customer agrees that the Company may substitute the incorrect price set out in the Order for the correct price (whether the price specified on a valid Quotation or the Company's prevailing standard price, as appropriate) and charge accordingly.
- 6.3 The Company shall be entitled at any time by giving notice in Writing, before or after final invoicing to make a reasonable adjustment to the price in the event of any alteration in quantity, design or specification requested by the Customer.
