

PolySure

PolySure is our radial press fit system, available in UK sizes, and installed using specialist crimping tools now with Plastic fittings introduced into the Polysure Fittings range

PolySure features secure, tamperproof jointing technology for a permanent fit. The slim profile fittings are ideal for use in visible installations. An inbuilt location washer ensures the crimping tool jaws are correctly positioned for accurate fitting and a visual socket depth indicator and double O-ring seal provides enhanced jointing.

PolySure can be used in any hot and cold water installation but is particularly suited to buildings with high levels of public access traffic, where security and joint integrity are paramount.

NEW Polysure Plastic Fittings

We have now introduced the first six fittings into the Polysure Plastic fittings range, which are available for distribution with immediate effect. They are as follows:
