

Pipe Fittings & Accessories

Pipe Fittings & Accessories

Our range of prepacked and loose brass compression fittings require no specialist tools and can be used for water supply and heating installations.

Our end feed and lead free pre-soldered copper fittings require a blow torch, wire wool, flux paste and a solder mat. Flexible tap connectors are very helpful when pipework needs to be re-aligned and when fitting new or replacement sinks baths or WCs. Some include their own valve which is essential for isolating and when servicing appliances. We have introduced extra length products of 500mm and 900mm in line with customer demand, a wide range of metal pushfit as well as large bore for low pressure areas.

We provide Isolating, Servicing, Gate and Radiator valves, a comprehensive range to cover most household requirements. All prepacks include easy to follow fitting instructions.
