**HAPAS** Certificate 13/H205 **Product Sheet 2** 

## POLYPIPE DUCTING SYSTEMS

## COMTITE DUCTING PLUG

This HAPAS Certificate Product Sheet(1) is issued by the British Board of Agrément (BBA), supported by the Highways Agency (HA) (acting on behalf of the Overseeing Organisations of the Department for Transport; Transport Scotland; the Welsh Assembly Government and the Department for Regional Development, Northern Ireland), the Association of Directors of Environment, Economy, Planning and Transport (ADEPT), the Local Government Technical Advisers Group and industry bodies. HAPAS Certificates are normally each subject to a review every three years. (1) Hereinafter referred to as 'Certificate'.

This Certificate replaces Certificate 90/R049 and relates to the Comtite Ducting Plug, for use in highways as underground ducting for electricity, gas and water supply services, and for street lighting cables and fibreoptic cabling for telecommunications.

#### **CERTIFICATION INCLUDES:**

- factors relating to compliance with HAPAS requirements
- factors relating to compliance with Regulations where applicable
- independently verified technical specification
- assessment criteria and technical investigations
- design considerations
- installation guidance
- regular surveillance of production
- formal three-yearly review.

#### **KEY FACTORS ASSESSED**

Strength — the product has adequate strength to resist the loads likely to be encountered during service (see section 6).

Resistance to elevated temperatures — cables with a surface temperature of up to 60°C will not affect the integrity of the duct plug (see section 7).

Resistance to chemicals — the product has an adequate resistance to attack from chemicals likely to occur in soils and groundwater (see section 8).

The BBA has awarded this Certificate to the company named above for the products described herein. These products have been assessed by the BBA as being fit for their intended use provided they are installed, used and maintained as set out in this Certificate.

On behalf of the British Board of Agrément

Date of First issue: 14 November 2013

B Chambelair Brian Chamberlain

Head of Approvals — Engineering

Claire Curtis-Thomas

Chief Executive

The BBA is a UKAS accredited certification body — Number 113. The schedule of the current scope of accreditation for product certification is available in pdf format via the UKAS link on the BBA website at www.bbacerts.co.uk

Readers are advised to check the validity and latest issue number of this Agrément Certificate by either referring to the BBA website or contacting the BBA direct.

# Requirements

In the opinion of the BBA, the Comtite Ducting Plug, when used in accordance with the provisions of this Certificate, will meet or contribute to meeting the following requirements of the Manual of Contract Documents for Highways Works (MCHW)<sup>[1]</sup>, Specification for Highways Works (SHW), Volume 1 and Volume 3.

(1) The MCHW is operated by the Overseeing Organisations: The Highways Agency (HA), Transport Scotland, the Welsh Assembly Government and the Department for Regional Development (Northern Ireland).

# Regulations

Construction (Design and Management) Regulations 2007

Construction (Design and Management) Regulations (Northern Ireland) 2007

Information in this Certificate may assist the client, CDM co-ordinator, designer and contractors to address their obligations under these Regulations.

See section

3 Delivery and site handling (3.1) of this Certificate.

# Technical Specification

## 1 Description

- 1.1 The Comtite Ducting Plug is for use with the Ridgiduct Ducting (see Product Sheet 1 of this Certificate), and provides a suitable method for securing internal cables and pipes within the ducting system. One plug is used at each end of a run of ducting.
- 1.2 The plug (see Figure 1) comprises a two-part interlocking EPDM body held together with a centre bolt. This bolt incorporates a valve to release any pressure which may build up in the ducting during installation. The valve is also used for carrying out the air pressure test with the core valve part removed. Eight compression plates, four on each face, connected by bolts, provide additional support and, when tightened, seal the EPDM body against the walls of the duct.

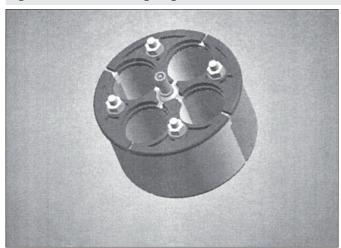

Figure 1 Comtite Ducting Plug

1.3 The product is constructed with four holes in which a selection of grommets can be inserted. The range of grommets is given in Table 1.

Table 1 Range of plugs and grommets	
Product code	Description
DP 94	94 mm ducting plug
DP 100	100 mm ducting plug
DPG 0	Blanking grommet
DPG 9	9 mm grommet
DPG 12	12 mm grommet
DPG 14	14 mm grommet
DPG 16	16 mm grommet
DPG 18	18 mm grommet
DPG 21	21 mm grommet
DPG 24	24 mm grommet
DPG 27	27 mm grommet
DPG 4 x 9	$4~\text{mm} \times 9~\text{mm}$ grommet
DPG 7 x 9	7 mm x 9 mm grommet

- 1.4 The product is available in two sizes to suit the 94 mm and 100 mm Ridgiduct pipe.
- 1.5 Beginning and ending the ducting system with the Comtite Ducting Plug, and incorporating optional sealed couplings, produces a system with protection against penetration by solid foreign objects of 1 mm diameter or greater and against ingress of water at 1 metre depth, ie an IP rating of IP47 to BS EN 60529: 1992.
- 1.6 When using the Comtite Ducting Plug, Ridgiduct RB 94 and RB 100 are suitable for motorway communications applications as a sealed system to BS EN 61386-24: 2010.

#### 2 Manufacture

- 2.1 The EPDM components are manufactured using conventional injection moulding techniques. The compression plates are manufactured from Acytal using conventional injection moulding techniques.
- 2.2 As part of the assessment and ongoing surveillance of product quality, the BBA has:
- agreed with the manufacturer the quality control procedures and product testing to be undertaken
- assessed and agreed the quality control operated over batches of incoming materials
- monitored the production process and verified that it is in accordance with the documented process
- evaluated the process for management of nonconformities
- checked that equipment has been properly tested and calibrated
- undertaken to carry out the above measures on a regular basis through a surveillance process, to verify that the specifications and quality control operated by the manufacturer are being maintained.
- 2.3 The management system of Polypipe Civils Ltd has been assessed and registered as meeting the requirements of BS EN ISO 9001: 2008 by BSI (Certificate Q06225).

## 3 Delivery and site handling

- 3.1 The Comtite Ducting Plug is individually bagged and the grommets bagged in packs of five for each type of grommet.
- 3.2 The Comtite Ducting Plug has good resistance to UV degradation. When long-term storage is envisaged, the plugs must be stored away from direct sunlight.

# Assessment and Technical Investigations

The following is a summary of the assessment and technical investigations carried out on the Comtite Ducting Plug.

# **Design Considerations**

#### 4 General

The Comtite Ducting Plug, when installed in accordance with the recommendations given in this Certificate, is suitable for use in highways for underground ducting for electricity services, and for street lighting cables and fibre optic cabling for cable television and telecommunications.

## 5 Practicability of installation

The products are designed to be installed by a competent general builder, or a contractor, experienced with these types of product.

#### 6 Strength

- 6.1 The product has adequate strength to resist the loads likely to be encountered during service when used and installed in accordance with the recommendations given in this Certificate.
- 6.2 The product has adequate resistance to the impact loads normally encountered during handling and installation.

## 7 Resistance to elevated temperatures

- 7.1 The maximum temperature to which the duct plug will be subject in service as part of an electrical cable ducting system is dependent on the ground thermal conductivity, depth of burial, ground temperature and the heat load imposed by the electrical cable.
- 7.2 In general, cables with a surface temperature of up to  $60^{\circ}$ C will not affect the integrity of the duct plug. For example, in a typical installation with a  $300 \text{ mm}^2$  copper cable carrying a current of 600 amps imposing a heat load of  $25 \text{ W} \cdot \text{m}^{-1}$ , the cable would have a surface temperature of  $60^{\circ}$ C.

#### 8 Resistance to chemicals

The materials used to manufacture the plug have adequate resistance to attack from chemicals likely to occur in soils and groundwater. Details of chemical resistance of the materials are given in CP 312-1: 1973.

#### 9 Maintenance

As the product is buried and have suitable durability (see section 10), maintenance is not required.

## 10 Durability

When used in the context of this Certificate, the Comtite Ducting Plug will have adequate durability.

#### Installation

#### 11 General

- 11.1 The Comtite Ducting Plug must be installed in accordance with the requirements of the manufacturer's instructions, and any additional site requirements (see section 1).
- 11.2 The general requirements for a ducting system are to be in accordance with Product Sheet 1, sections 11 and 12.
- 11.3 The grommets have a high friction surface which would impede the installation or withdrawal of cables. To overcome this, the grommets are split along their length to allow them to be clipped over the cable once it has been pulled through.

# Technical Investigations

#### 13 Tests

Tests were carried out to determine:

- dimensional accuracy
- airtightness

### 14 Investigations

- 14.1 An examination was made of data relating to:
- chemical resistance
- heat dissipation
- effect of temperature

- watertightness of joints
- degree of protection against foreign objects.
- practicability of installation
- material properties
- durability.
- 14.2 The manufacturing process was examined, including the methods adopted for quality control, and details were obtained of the quality and composition of the materials used.

# Conditions of Certification

### 15 Conditions

15.1 This Certificate:

- relates only to the product/system that is named and described on the front page
- is issued only to the company, firm, organisation or person named on the front page no other company, firm, organisation or person may hold or claim that this Certificate has been issued to them
- is valid only within the UK
- has to be read, considered and used as a whole document it may be misleading and will be incomplete to be selective
- is copyright of the BBA
- is subject to English Law.
- 15.2 Publications, documents, specifications, legislation, regulations, standards and the like referenced in this Certificate are those that were current and/or deemed relevant by the BBA at the date of issue or reissue of this Certificate.
- 15.3 This Certificate will remain valid for an unlimited period provided that the product/system and its manufacture and/or fabrication, including all related and relevant parts and processes thereof:
- are maintained at or above the levels which have been assessed and found to be satisfactory by the BBA
- continue to be checked as and when deemed appropriate by the BBA under arrangements that it will determine
- are reviewed by the BBA as and when it considers appropriate.
- 15.4 The BBA has used due skill, care and diligence in preparing this Certificate, but no warranty is provided.
- 15.5 In issuing this Certificate, the BBA is not responsible and is excluded from any liability to any company, firm, organisation or person, for any matters arising directly or indirectly from:
- the presence or absence of any patent, intellectual property or similar rights subsisting in the product/system or any other product/system
- the right of the Certificate holder to manufacture, supply, install, maintain or market the product/system
- actual installations of the product/system, including their nature, design, methods, performance, workmanship and maintenance
- any works and constructions in which the product/system is installed, including their nature, design, methods, performance, workmanship and maintenance
- any loss or damage, including personal injury, howsoever caused by the product/system, including its manufacture, supply, installation, use, maintenance and removal
- any claims by the manufacturer relating to CE marking.
- 15.6 Any information relating to the manufacture, supply, installation, use, maintenance and removal of this product/system which is contained or referred to in this Certificate is the minimum required to be met when the product/system is manufactured, supplied, installed, used, maintained and removed. It does not purport in any way to restate the requirements of the Health and Safety at Work etc. Act 1974, or of any other statutory, common law or other duty which may exist at the date of issue or reissue of this Certificate; nor is conformity with such information to be taken as satisfying the requirements of the 1974 Act or of any statutory, common law or other duty of care.
