

PRODUCT INFORMATION

ISSUE 1 - August 2017

Product code: UG416S, UG422S, UG622S & PS622S

The Polypipe 45° Sealed Aluminium Rodding Eye is used as an access point on a branch drain for rodding, testing and removal of debris. Rodding eyes provide access for clearance of debris in the direction of flow only and should only be used in conjunction with an inspection chamber or manhole downstream of the rodding eye.

Key Benefits

- Made from aluminium, weather resistant, lightweight design for easy handling
- For installation in concrete or tarmac. In other paving materials, install within concrete surround
- For use in lightly loaded areas such as domestic gardens and footpaths when installed with a full concrete surround (see installation detail below)
- Sealed with removable locking screws.
- Single seal with either 110mm spigot, full depth 110mm or 160mm ring seal socket to BS EN 1401, or 150mm Polysewer socket
- Building Regulations Approved Document H compliant

Building Regulations – Maximum Spacing of Access point

| From | To Access fitting | To Junction | To Inspection chamber | To Manhole |
|-------------|-------------------|-------------|-----------------------|------------|
| Rodding Eye | 22m | 22m | 45m | 45m |
