

Vacancy

Research & Development Project Engineer

We have an exciting new opportunity in our Research and Development department for a Development Project Engineer.

Reporting directly to the Technical Director the successful candidate shall be responsible for the development of targeted products to accompany the MecFlow product line, aiding the distribution of water within building services.

As such the successful candidate shall be responsible for delivering development projects on time and to cost and shall take the lead in all phases of the project to include design, prototyping, material selection, product testing and approval. In doing so the successful candidate is expected to form key relationships with both internal and external stakeholders that will be essential to successful project delivery. The successful candidate shall:

- Be degree qualified in an engineering or design discipline
- Have at least 5 years post graduate experience preferably in a plumbing product design capacity
- Have an in-depth knowledge of project management, AutoCAD design and MS Office software
- Have knowledge of FMEA and DfMA concepts and their use within the product design cycle
- An ability to analyse and solve complex engineering problems both as an individual and taking the lead in a multi-disciplined team
- Have knowledge of materials selection used for the plumbing industry and its associated products
- Have knowledge of type testing required for plumbing products in the UK (desirable)
- Have experience of taking product(s) through industry 3rd party approvals (desirable)
- Have experience of protecting new products and concepts with IP (desirable)
- Be able to work within our company values framework
- Be prepared to commit to further personal development as our company values adapt
- Have an open and collaborative communication style

To apply for this position, please send your application by email, with a current CV, to: ian.crickmore@polypipe.com

Closing Date: 1st February 2021
