## Welcome to Genuit Group

Here at Genuit Group, we are making the built environment more sustainable by helping create a more resilient planet, society and business. Sustainability is core to our commercial strategy, driving innovation in both how we run our business and products we create. We find solutions for the environmental challenges facing our infrastructure, our buildings and our communities, and deliver these at scale.

Part of the Genuit Group Polypipe Building Services develops and delivers engineered solutions in both drainage and water supply. Specialists in building services, we deliver our products and services to commercial and multi-occupancy buildings, high-rise residential and commercial office projects and healthcare and leisure facilities, whether new build or retrofit projects.

Focused on helping our customers create safe and sustainable services in commercial buildings, we always look to advance our products and services so that they optimise on-site productivity, promote consistent quality and reduce time, cost and waste in installation.

## **TERRAIN**

With over 50 years setting the industry benchmark in drainage, we proudly deliver our drainage products and solutions through our trusted Terrain brand.

Backed by our specialist technical team, we support in design, product selection through to installation and final system inspection.

Don't forget to check out our Polypipe Advantage Service, where we design, manufacture, test and deliver fabricated drainage stacks making installation of drainage systems not only easier, but faster too.

## A Guide to the Terrain PVC Drainage Numbering System

### Above Ground Drainage

#### Series

100 = PVCu Solvent Weld Soil  
 100P = PVCu Push-fit Soil  
 200 = MuPVC Solvent Weld Waste  
 300 = PP Push-fit Waste  
 400 = Traps  
 500 = PVCu Overflow  
 600 = ABS Waste  
 700P = Terrain Q  
 900 = FUZE

#### Type of Fitting

100 = Pipe  
 101 = Bend (Double Socket)  
 104 = Branch  
 106 = Corner Branches  
 107 = Bend (Spigot Socket)  
 110/111 = Couplings  
 13x = Access Fittings  
 (these numbers are the same for all series)

#### Diameter

1.25 = 1½" or 32mm N/D waste  
 1.5 = 1½" or 40mm N/D waste  
 2 = 2" or 50mm N/D waste  
 3 = 3" or 82mm O/D soil  
 4 = 4" or 110mm O/D soil  
 6 = 6" or 160mm O/D soil  
 8 = 8" or 200mm O/D soil  
 10 = 10" or 250mm O/D soil

#### Colour

G = Grey  
 B = Black  
 W = White  
 R = Rustic (Brown)  
 T = Terracotta

## Introduction

Having pioneered the development of solvent-welded systems, Terrain soil and waste products represent the industry benchmark for quality, installation flexibility and product innovation backed by the highest levels of customer service.

Terrain drainage systems include an extensive range of soil and waste drainage products for high rise residential, hotels, hospitals, schools and public sector developments, all built on the strength of the Terrain brand.

Systems include solvent-welded and push-fit options for both soil and waste drainage; overflow and trap systems; and a comprehensive range of adaptors and accessories. Products are available in a range of colours.

- Industry leading range of solvent and push-fit soil and waste solutions.
- Unique products offer unrivalled installation options.
- Adaptable to our Terrain FUZE system.
- Includes a number of unique UK fittings making it versatile for a number of applications.

### 100-Solvent **Terrain Soil System**

#### *PVCu soil pipes and fittings*

- 82, 110 and 160mm integrated systems
- Wide range of bends, branches and access fittings to meet all application requirements
- Great problem solving products in the range

### 100P-PushFit **Terrain Soil System**

#### *PVCu soil pipes and fittings for push-fit jointing*

- 82, 110, 160, 200 and 250mm integrated systems
- Saves time and labour costs
- Also for use with Terrain roof outlets for rainwater drainage

### 200-Solvent **Terrain Waste System**

#### *Solvent-welded MuPVC system*

- 32, 40 and 50mm integrated systems
- Wide range of bends and adaptors
- Integrated floor gullies

### 300-PushFit **Terrain Waste System**

#### *Push-fit polypropylene system*

- 32 and 40mm integrated systems
- Quick and easy to install
- Saves time and labour costs

### 400-Traps **Terrain Traps**

#### *Polypropylene traps*

- 32 and 40mm polypropylene traps
- Range includes self resealing bottle traps
- All traps have universal compression outlets which, in addition to all Terrain waste pipes, will accept other MuPVC waste pipe

### 500-Overflow **Terrain Overflow System**

#### *Solvent-welded PVCu system for cold, non-pressure water*

- 19mm PVCu pipe and fittings
- Range of tank connectors

### 600-Solvent **Terrain Waste System**

#### *Solvent-welded ABS system*

- 32, 40 and 50mm integrated systems
- Wide range of bends and adaptors

POLYPIPE  
ADVANTAGE

## MORE THAN FABRICATION

Polypipe Advantage is more than fabrication.  
But what do we mean by more?

From quotation to final delivery, you're in control.

With access to our team of specialists, full details on scheduling and logistics, detailed information and visual designs - all at your fingertips.

Fabricated water supply systems and drainage stack solutions arrive on-site, fully configured and ready to install. Whilst a dedicated project manager and technical team cover every detail to ensure that it fits perfectly; first time, every time.

What's more, using the Polypipe Advantage Service gives you more time savings, more cost-effective installations and makes a complex project, simple. What more could you possibly need?

Add more to fabrication, visit

## Terrain FUZE

### Introduction

A modern high density polyethylene system with many advantages over cast iron and other traditional systems. Terrain FUZE is a top-to-bottom solution for all above ground drainage and many chemical waste applications. It allows specifiers and installers to benefit by providing them maximum flexibility in the design process.

Utilising the intrinsic properties of high-density polyethylene, Terrain FUZE offers greater benefits above and beyond more traditional materials and performs significantly better when tested for impact and abrasion resistance, chemical corrosion and extreme temperatures.

The lightweight nature of Terrain FUZE allows the product to be installed quickly and efficiently, giving direct, resource-saving benefits to specifiers and installers.

HDPE offers exceptional performance above and beyond traditional pipe materials including:

- Versatile application
- Highly resistant to impact even at low temperatures
- Highly resistant to chemical agents
- Corrosion resistant
- Abrasion resistant
- Lightweight and easy to install
- Ideal for fabrication through our Polypipe Advantage Service

## Innovative Products

### Terrain FUZE HDPE Manifolds

A product designed with the customer in mind, for many different scenarios. Featuring 12 perfectly situated bosses, this allows for multiple different entry points; all of which can be used simultaneously due to the engineered central baffle removing cross flow. See page 48 for further details.

### Terrain Anchor / Guide Bracket

This dual use guide or anchor bracket has a simple clip, which once removed, allows adjustability for the product to go from guide to anchor. This multi-functional product is engineered to ease installation and lessen time taken. See page 57 for further details.

### Terrain FUZE HDPE Swept Entry Branch

The Terrain FUZE 904.110.925B HDPE swept entry branch is engineered as a unique space-saving fitting. It offers 5 bosses which can be easily converted to waste. Using our 927 adapters, it can connect to other materials. This fitting is ideal for use with our Polypipe Advantage service. See page 46 for further details.

2 IN 1 BRACKET, WORKS AS A GUIDE OR ANCHOR

- MULTI-FUNCTIONAL PRODUCT TO STORE LESS PRODUCT, RESULTING IN LARGE REDUCTION OF SKU.
- INSTALL WITH OUR NEW FIXING BACK PLATE (9148, 108), CHANGED TO A RECTANGULAR SHAPE, FOR EASY INSTALLATION.
- FOR LARGER DIAMETER SIZES, WE RECOMMEND M16 BRACKETS (9149)

Electrofusion Coupling

- Available in sizes 40 - 315mm
- Connection properties:
- Non-removable
- Tension resistant

Use

This form of jointing is suitable for on-site welding, additional installations, repair work and modifications.

The pressure required for welding is obtained from the shrinking effect of the sleeve upon heating and is distributed equally over the entire weld.

This shrinkage has a compensating effect on pipe diameter measurement tolerances.

By removing the central stop ring, the electrical sleeves can be made to slide to enable system modifications and repairs.

The electrical resistance wires will not corrode as they are protected by HDPE after welding.

Pipe scraper

Terrain FUZE Box

Cut the pipe squarely, dry, clean and scrape the welding surfaces.  
The surface must remain clean and dry during the whole welding process, therefore do not touch with your hands.

The length of pipe to be scraped with diameters ranging from 40 - 160mm is 35mm.

The length of pipe to be scraped with diameters 200, 250 and 300mm is 100mm.

Insert pipe or fitting into sleeve coupling. If the stop ring in the sleeve needs to be removed, mark the depth at 30mm.

## Expansion Socket with Ring Seal

- Connection properties:
- Non-removable
- Non-tension resistant

Horizontal assembly (e.g. at an ambient temperature of 20°C).

## Use

Expansion sockets can be used in underground pipe systems as normal push-fit fittings but must be provided on vertical stacks running from floor to floor and for rainwater pipes both inside and outside the building.

- Replaces extensive ventilation pipework, saving costs in material and installation.
- Allows more flexibility in the layout and design of internal drainage systems for engineers, architects and design professionals.
- Offers a point-of-need solution that quickly responds to transient air fluctuations.

## Terrain Pleura 50\*

The Terrain Pleura 50 air regulator provides ventilation to branch pipework. It is generally installed on the pipe behind the appliance trap.

The Terrain Pleura 50 opens and admits fresh air into the branch pipe when the negative (suction) pressure occurs from an appliance discharging into the pipework system. This equalises the ambient air pressure within the pipework and protects the trap seal.

When the flow stops and the internal ambient air pressure in the pipework balances, the Terrain Pleura 50 closes by gravity and prevents foul air entering the built environment.

## Terrain Pleura 100\*

The Terrain Pleura 100 air regulator can be fitted on to the top of a foul or waste stack, or at the end of long low gradient branch drains, to provide ventilation.

The Terrain Pleura 100 opens and admits fresh air under condition of reduced pressure in the discharge pipes and prevents trapped water seals being drawn. As the internal ambient air pressure in the pipework balances, the Terrain Pleura 100 closes by gravity and prevents foul air entering the built environment.

\*Valves to be installed only on Polypipe pipework.

## Terrain P.A.P.A.\*

The Terrain P.A.P.A. is a positive air pressure attenuator, designed to mitigate the affects of positive air fluctuations in the drainage pipework system. As water descends down the drainage stack it creates a negative pressure; if that flow is interrupted or is approaching a change of direction, the negative pressure changes to a positive pressure and moves up the pipe. This low amplitude air wave travels typically at 320m/s, the speed of sound. As the positive air fluctuation approaches the branch-off point for the Terrain P.A.P.A., the bladder within the unit reacts very quickly, within 0.2 seconds, and starts to expand; this creates a pressure differential at the branch-off point. The branch to the Terrain P.A.P.A. then becomes the path of least resistance and the majority of the positive air pressure is absorbed within the unit.

As the ambient air pressure within the pipework starts to equalise, the bladder slowly releases the small volume of air into the pipework system t only 12m/s which will have no effect on the trap seals.

## CLICK. WELD. DONE.

Introducing a new water supply system. One that's quick to install with a unique and simple click and electrofusion welding system. One that's material formulation achieves a fire classification of B-s1, d0\* and is suitable for multiple water supply applications. Designed and manufactured off-site through our Polypipe Advantage service, MecFlow is delivered in a kit, ready to install for a smart, quick installation.

MecFlow – The future of water supply

\*Fire classification rating according to EN13501, installed according to building regulations. We recommend MecFlow be installed with our Firetrap sleeves.

## Terrain Q. Turning flush sounds into hush sounds.

Designed to meet your specific project needs, Terrain Q is a simple, reliable alternative to other traditional noise reducing drainage systems. Its multi-layer noise reducing system also provides increased fire retardancy, with a fire classification of B-s1, d0\*, crucial for todays:

- High Rise Developments
- Hospitals
- Hotels
- Schools
- Other Commercial Applications

With excellent noise reducing properties and high fire retardancy, coupled with its ease of installation thanks to the push-fit jointing method, its compatibility with other systems and fittings, Terrain Q is an ideal choice for all your drainage and noise reducing project requirements.

## Terrain Q Benefits

- Low Noise Transmission
- Fire Classification B-s1, d0
- Chemical Resistance
- Anti- Fouling
- Increased Mechanical Strength
- Push-Fit Jointing
- UV Protection
- Abrasion Resistance
- Easy Handling

Terrain Q has a wide range of pipe and unique fittings, from 40mm to 200mm diameter, making it an ideal solution for the installation of a complete drainage system.

## Advanced Technology and Performance

Terrain Q stands out for its high resistance to fire, rated B-s1,d0\* according to the European standard EN 13501 and for its excellent sound absorbing properties, according to the data provided by the Fraunhofer Institute for Building Physics IBP.

\*Fire classification rating B-s1,d0 according to EN 130501, Terrain Q to be installed in accordance with building regulations. Where required we recommend Terrain Q is installed with Terrain Firetrap sleeves.

## Terrain Underground

### Introduction

Using the latest plastics manufacturing technology to satisfy the requirements of today's installers, the Terrain underground range offers both rigid and foam core pipe and a comprehensive range of fittings to suit all applications.

Terrain underground products represent the benchmark for quality, supported with outstanding service levels.

Our comprehensive range of underground drainage products are suitable for commercial, industrial, housing and public sector developments.

They are:

- Easy-to-lay
- Flexible, to accommodate normal ground movement
- Adaptable, to connect to existing drainage systems
- Unique products offer unrivalled installation options
- Suitable for commercial and domestic installations

Systems include:

## Solid wall pipes and fittings

Available in 82, 110 and 160mm diameters. 110 and 160mm comply with BS EN 1401.

## Foamcore pipe

Manufactured using the latest tri-extrusion techniques to produce a three layer pipe that is 25% lighter than standard PVCu pipe.

Available in 110 and 160mm diameters.

Flexicon Couplings

Flexicon couplings are available as straight connections or adaptors for a wide range of pipe materials and sizes.

These robust EDPM flexible rubber couplings have been manufactured to BS EN 681-1 and are ideal for jointing pipes for sewerage, drainage and other low pressure applications.

Flexicon couplings can be manufactured from other types of rubber to suit customer requirements.
